

Workshop “Linking Floods Directive and Water Framework Directive”

“Questionnaire results”

Giuseppina Monacelli, Barbara Lastoria
ISPRA - Italian National Institute for Environmental
Protection and Research

PREPARATORY Questionnaire sent in August

The image shows a two-page document titled "PREPARATORY QUESTIONNAIRE". The header includes the workshop title "ESF WG F - WORKSHOP LINKS BETWEEN THE FLOODS DIRECTIVE AND THE WATER FRAMEWORK DIRECTIVE" and the organizing institution "Società Geografica Italiana, Villa Celimontana, Rome, Italy".

PREPARATORY QUESTIONNAIRE

Building on the WFD-FD Links Document (Technical Report - 2014 - 07E), this short questionnaire is intended to capture experiences, lessons learned and opportunities identified for coordination and information exchange during the PFRA and Flood Maps Stage and to explore on closer details to promote effective and efficient coordination for the FRMP / RBMP stage.

The questionnaire should take 15-20 minutes to complete, and your input would be highly valued. In responding, it would be very useful if you could provide web links to any relevant material or documents.

1. RESPONDENT DETAILS

Name:	
Email:	
Country:	
Organisation:	
Type of Organisation:	(e.g. Centre, Local Govt, Research Institute, NGO, etc.)

2. PFRA

2.1 Please identify the degree of coordination or information exchange with the WFD for the PFRA stage.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

(Tick-box from 1 to 7, with 1 = Very limited coordination / information exchange to 7 = Full integration)

2.2 Please describe briefly what coordination or information exchange activities were undertaken with the implementation of the WFD at the PFRA stage during the first cycle of the FD.

2.3 Please list up to three opportunities identified for coordination or information exchange with the implementation of the WFD during the first cycle of implementation of the FD.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

(Tick-box from 1 to 7, with 1 = No coordination / information exchange to 7 = Full integration)

2.4 Please identify the potential for coordination in the second cycle.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

(Tick-box from 1 to 7, with 1 = No coordination / information exchange to 7 = Full integration)

2.5 Please list up to three opportunities identified or intended improvements for coordination or information exchange at the PFRA stage in the second cycle.

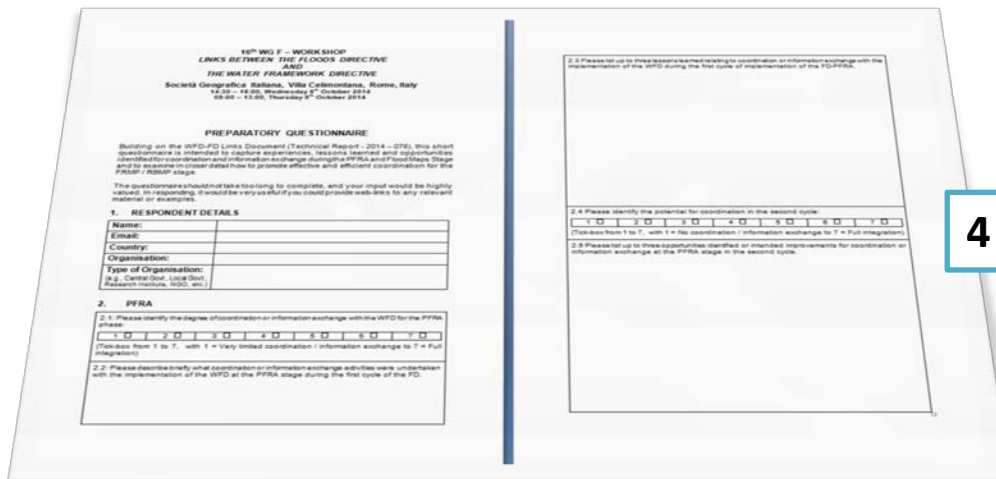

AIMs of Questionnaire:

- To capture experiences, lessons and opportunities identified for coordination and information exchange during PFRA and Flood Maps Stages
- to examine in closer detail how to promote effective and efficient coordination for the FRMP / RBMP stage

Questionnaire team:

Mark Adams – Clemens Neuhold – Barbro Naslund – Ioannis Kavvadas – Jorge Jureta – Giuseppina Monacelli – Martina Bussettini – Barbara Lastoria

PREPARATORY Questionnaire

The image shows a two-page document titled "16P WG F - WORKSHOP LINKS BETWEEN THE FLOODS DIRECTIVE AND THE WATER FRAMEWORK DIRECTIVE". It is a preparatory questionnaire for a workshop held in Rome, Italy, on October 8-9, 2014. The document is divided into four main sections:

- 1. RESPONDENT DETAILS**: Includes fields for Name, Email, Country, and Type of Organisation.
- 2. PFRA**: Section 2.1 asks for the degree of coordination/information exchange with the WFD for the PFRA phase, with a scale from 1 to 7. Section 2.2 asks for a brief description of coordination or information exchange activities undertaken with the implementation of the WFD at the PFRA stage during the first cycle of the FD.
- 3. FLOOD MAPPING**: Section 3.1 asks for the potential for coordination in the second cycle, with a scale from 1 to 7. Section 3.2 asks for opportunities identified or intended improvements for coordination or information exchange at the PFRA stage in the second cycle.
- 4. FRMPs / RBMPs**: Section 4.1 asks for the degree of coordination/information exchange with the WFD for the FRMP/RBMP phase, with a scale from 1 to 7. Section 4.2 asks for a brief description of coordination or information exchange activities undertaken with the implementation of the WFD at the FRMP/RBMP stage during the first cycle of the FD.

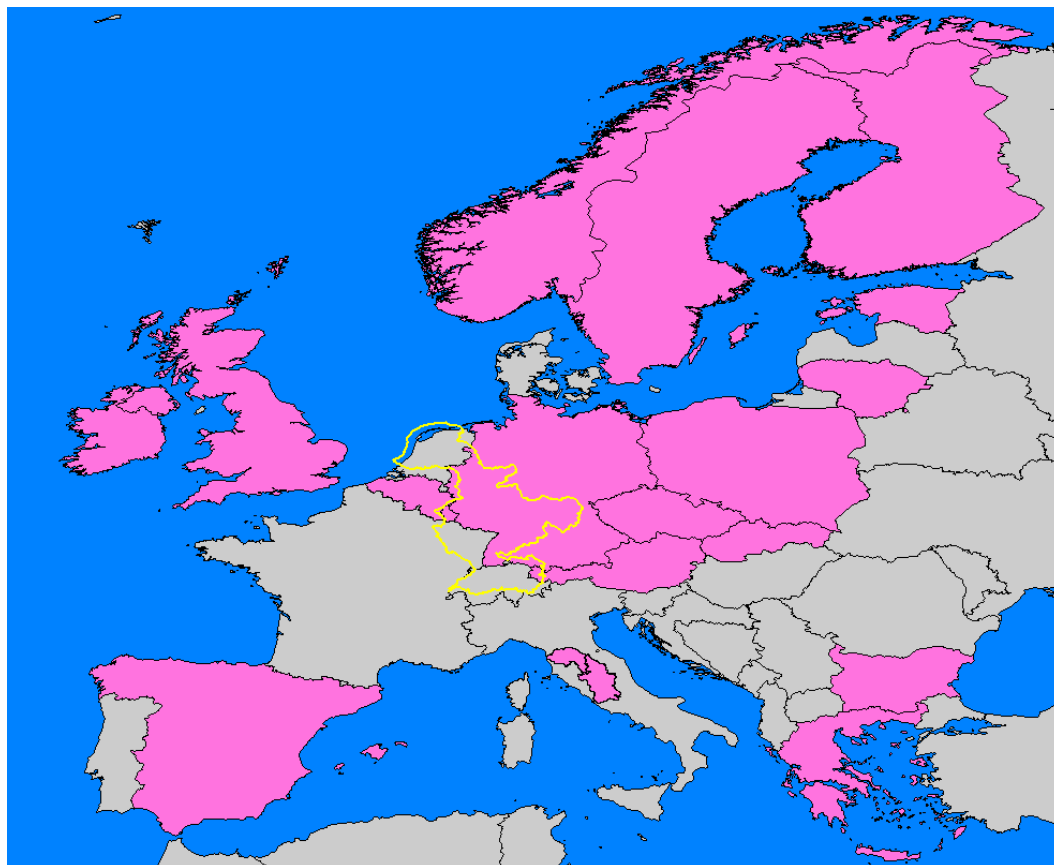

4 SECTIONS

- 1) RESPONDENT DETAILS
- 2) PFRA
- 3) FLOOD MAPPING
- 4) FRMPs / RBMPs

PREPARATORY Questionnaire

1) RESPONDENT DETAILS

COUNTRY
ENGLAND
NORTHERN IRELAND
GERMANY
ITALY – TEVERE RBA
AUSTRIA
IRELAND
THE NETHERLANDS
ESTONIA
POLAND
LUXEMBOURG
NORWAY
GREECE
FINLAND
LATVIA
BULGARIA
SWEDEN
ITALY – ARNO RBA
CZECH REPUBLIC
SPAIN
SLOVAK REPUBLIC

+ RHINE COUNTRIES
(International Commission
for the Protection of the
Rhine – ICPR)

Workshop “Linking Floods Directive and Water Framework Directive”

Società Geografica Italiana, Villa Celimontana, Rome 8-9 October 2014

PREPARATORY Questionnaire

2) PFRA

2.1 – Please identify the degree of coordination or information exchange with the WFD for the PFRA phase.

COUNTRY	Coordination PFRA phase							
	1 = Very limited coordination / information exchange to 7 = Full integration							
	<i>Transitional Measure</i>	1	2	3	4	5	6	7
ENGLAND		X						
NORTHERN IRELAND				X				
GERMANY				X				
ITALY – TEVERE RBA	13.1.b							
AUSTRIA				X				
IRELAND			X					
THE NETHERLANDS	13.1.b							
ESTONIA							X	
POLAND		X						
LUXEMBOURG		X						
NORWAY							X	
GREECE								X
FINLAND				X				
LATVIA				X				
BULGARIA					X			
SWEDEN			X					
ITALY – ARNO RBA	13.1.b							
CZECH REPUBLIC							X	
SPAIN						X		
SLOVAK REPUBLIC				X				
ICPR			X					

PREPARATORY Questionnaire

2) PFRA

2.2 – Please describe briefly what coordination or information exchange **activities were **undertaken** with the implementation of the WFD at the PFRA stage during the first cycle of the FD.**

Utilisation of shared geographic data (RBD boundaries - river network - protected areas) and environmental risk data (protected areas + pollution sources)

2.3 – Please list up to three **lessons learned relating to coordination or information exchange with the implementation of the WFD during the first cycle of implementation of the FD-PFRA.**

- Enhance coordination between WFD and FD management structures, dataset (including a common list of measures)
- Improve information/communication sharing.
- The main challenge is simultaneously realise cycle plans

PREPARATORY Questionnaire

2) PFRA

2.4 – Please identify the potential for coordination in the second cycle for the PFRA phase

COUNTRY	Potential Coordination PFRA phase - II cycle 1 = Very limited coordination / information exchange to 7 = Full integration						
	1	2	3	4	5	6	7
ENGLAND							X
NORTHERN IRELAND					X		
GERMANY		X

AUSTRIA					X		
IRELAND				X			
THE NETHERLANDS					X		
ESTONIA							X
POLAND		X					
LUXEMBOURG						X	
NORWAY							
GREECE							X
FINLAND				X			
LATVIA					X		
BULGARIA					X		
SWEDEN				X			
ITALY – ARNO RBA							
CZECH REPUBLIC						X	
SPAIN						X	
SLOVAK REPUBLIC					X		
ICPR			X				

Workshop “Linking Floods Directive and Water Framework Directive”

Società Geografica Italiana, Villa Celimontana, Rome 8-9 October 2014

PREPARATORY Questionnaire

2) PFRA

2.5 – Please list up to three **opportunities identified or intended **improvements** for coordination or information exchange at the PFRA stage in the second cycle.**

- Harmonise and interlink FD and WFD data sets especially if different local authorities are involved.
- Take into account new up-to-date information about “Climate Change”.
- Explore the value in shared stakeholder involvement to allow greater understanding of the holistic management aspects required for the implementation of measures under both directives.
- More detailed information derived from the PFRA on hydromorphological alterations could be available for the WFD second cycle.

PREPARATORY Questionnaire

3) FLOOD MAPPING

3.1 – Please identify the degree of coordination or information exchange

COUNTRY	Coordination Flood Mapping phase						
	1 = Very limited coordination / information exchange to 7 = Full integration						
	1	2	3	4	5	6	7
ENGLAND			X				
NORTHERN IRELAND				X			
GERMANY		X					
ITALY – TEVERE RBA					X		
AUSTRIA				X			
IRELAND			X				
THE NETHERLANDS

SPAIN						X	
SLOVAK REPUBLIC						X	
ICPR			X				

Workshop “Linking Floods Directive and Water Framework Directive”

Società Geografica Italiana, Villa Celimontana, Rome 8-9 October 2014

PREPARATORY Questionnaire

3) FLOOD MAPPING

3.2 – Please describe briefly what coordination or information exchange activities were undertaken with the implementation of the WFD at the flood mapping stage during the first cycle of FD.

- WFD datasets on protected areas and source of pollution have been used to produce one set of the risk maps.
- Flood information used in WFD analysis of GEP/GES for identification of HMWB and potential for hydromorphology mitigation measures.

3.3 – Please list up to three lessons learned relating to coordination or information exchange with the implementation of the WFD during the first cycle of the FD-flood mapping.

- There is some potential for FD mapping to explicitly include reference to hydromorphological issues (e.g. floodplain connectivity), as well as showing the potential for using natural water retention areas to attenuate flood flows.
- Define common representation scale, data accuracy and coordination in timing.

Workshop “Linking Floods Directive and Water Framework Directive”

Società Geografica Italiana, Villa Celimontana, Rome 8-9 October 2014

PREPARATORY Questionnaire

3) FLOOD MAPPING

3.4 – Was it possible, and if so in what ways, to make the information presented in the flood maps consistent with relevant information presented under WFD implementation?

- Difficult due to the different scale and level of detail.
- In flood risk maps, the desired consistency is explicitly mentioned in art. 6-5(c).
- Through the utilization of the same GIS system and of coherent territorial unit of management/district.
- Publication of all results related to both Directives done on one online platform.

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.1 – Please briefly describe the coordination structures and activities in place for FRMPs / RBMPs current implementation cycle.

1/6

COUNTRY	FRMPs / RBMPs - Coordination structures		
	Same organizational structures for the implementation of both plans		Structures/Tools for coordination
	YES	NO	
ENGLAND	X		<ul style="list-style-type: none"> Environment Agency Same web site to publish final FRMPs and RBMPs
NORTHERN IRELAND		X	<ul style="list-style-type: none"> Local Flood Forums Open to WFD stakeholders
GERMANY	X		<ul style="list-style-type: none"> German Working Group on Water Issues of the Federal States and the Federal Government (LAWA) River Basin Communities
ITALY		X	<ul style="list-style-type: none"> River basin national authorities together with the Regions are responsible for RBMPs River basin national authorities together with the Regions of the District and the National Department of Civil Protection are responsible for FRMPs

Workshop “Linking Floods Directive and Water Framework Directive”

Società Geografica Italiana, Villa Celimontana, Rome 8-9 October 2014

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.1 – Please briefly describe the coordination structures and activities in place for FRMPs / RBMPs current implementation cycle.

2/6

COUNTRY	FRMPs / RBMPs - Coordination structures		
	Same organizational structures for the implementation of both plans		Structures/Tools for coordination
	YES	NO	
AUSTRIA	X		<ul style="list-style-type: none"> Both directives are implemented by the BMLFUW. Supported by a decision commission addressing the Austrian federal system
IRELAND		X	<ul style="list-style-type: none"> Management or steering groups at national and RBD level assure cross-representation
THE NETHERLANDS	X		<ul style="list-style-type: none"> Administrative cooperation structure for the National and regional implementation of both Directives The RBMP and the FRMP are annexes of the National Water Plan
ESTONIA	X		<ul style="list-style-type: none"> Ministry of Environment FRMP is one part of RBMP

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.1 – Please briefly describe the coordination structures and activities in place for FRMPs / RBMPs current implementation cycle.

3/6

COUNTRY	FRMPs / RBMPs - Coordination structures		
	Same organizational structures for the implementation of both plans		Structures/Tools for coordination
	YES	NO	
POLAND	X		<ul style="list-style-type: none"> National Water Management Authority Concurrent RBMP and FRMP consultation process on “Reliable Plans”
LUXEMBOURG	X		<ul style="list-style-type: none"> Water Agency of Luxembourg
NORWAY			<ul style="list-style-type: none"> Norwegian Water Resources and Energy Directorate (NVE) FD is not implemented in Norwegian law A pilot program in the Gudbrandsdalen valley in the Glomma RBD aims to integrate total flood and land slide risk measures in a FRMP, taking into account agriculture
GREECE	X		<ul style="list-style-type: none"> SPECIAL SECRETARIAT FOR WATER (SSW) /MINISTRY OF ENVIRONMENT ENERGY AND CLIMATE CHANGE Units of Management are the same for both the WFD and the FD

Workshop “Linking Floods Directive and Water Framework Directive”

Società Geografica Italiana, Villa Celimontana, Rome 8-9 October 2014

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.1 – Please briefly describe the coordination structures and activities in place for FRMPs / RBMPs current implementation cycle.

4/6

COUNTRY	FRMPs / RBMPs - Coordination structures		
	Same organizational structures for the implementation of both plans		Structures/Tools for coordination
	YES	NO	
FINLAND		X	<ul style="list-style-type: none"> At national level Ministry of Agriculture and Forestry is responsible for FD and Ministry of the Environment is responsible for WFD National coordination groups with members from both ministries coordinate WFD and FD. At local level, Regional Centres for Economic Development, Transport and the Environment coordinate the implementation of both directives.
LATVIA	X		<ul style="list-style-type: none"> Ministry of Environmental Protection and Regional Development (MEPRD) is WFD and FD Competent Authority State limited Liability Company "Latvian Environment, Geology and Meteorology Centre" (LEGMC) is the implementation entity.

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.1 – Please briefly describe the coordination structures and activities in place for FRMPs / RBMPs current implementation cycle.

5/6

COUNTRY	FRMPs / RBMPs - Coordination structures		Structures/Tools for coordination
	Same organizational structures for the implementation of both plans		
	YES	NO	
BULGARIA	X		<ul style="list-style-type: none"> The Environment Ministry is the Competent Authority The River Basin Directorate is the management authority and coordinates both directives
SWEDEN	X		<ul style="list-style-type: none"> Coordination of FD is made at the water district level, by County Administrative Boards the same authorities responsible for the WFD
CZECH REPUBLIC			<ul style="list-style-type: none"> FRMPs / RBMPs are coordinated by Commission for Water planning. Both plans has identical sub-units (River sub-basin) River sub-basin plans are drawn up by river basin administrators.

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.1 – Please briefly describe the coordination structures and activities in place for FRMPs / RBMPs current implementation cycle.

6/6

COUNTRY	FRMPs / RBMPs - Coordination structures		Structures/Tools for coordination
	Same organizational structures for the implementation of both plans		
	YES	NO	
SPAIN	X		<ul style="list-style-type: none"> The units of management for the implementation of both WFD and FD are the same, the River Basin Districts In 14 out of 25 River Basin Districts the teams in charge of RBMPs and FRMPs are also the same, and in the other 11 teams are working very close
SLOVAK REPUBLIC	X (Partly)		<ul style="list-style-type: none"> Implementation of crucial part of measures in actual RBMPs and new RBMPs ensure right one company i.e. Slovak Water Management Enterprise (measures on water courses). Implementation of measures in forests or agricultural land is liability of freeholders
ICPR		X	<ul style="list-style-type: none"> National management plans for areas of operation in the IRBD Rhine The ICPR will coordinate the drafting of a single flood risk management plan on the level of the IRBD Rhine

Workshop “Linking Floods Directive and Water Framework Directive”

Società Geografica Italiana, Villa Celimontana, Rome 8-9 October 2014

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.2 – Please list the most important aspects of the RBMPs / FRMPs where coordination or information exchange is important and/or could be beneficial and give some brief reasoning as to why (examples might include objectives, measures (land use, NWRM, etc.), economics, public consultation, shared data, etc..)

Important ASPECT for coordination or information exchange	REASON
Flood risk impacts on good status (e.g. hydromorphology and diffuse pollution due to surface water run-off)	this is a key aspect that links WFD and flood risk management
Sharing data and mapping of areas with similar objectives	To save time and prevent duplication of work in the collecting process and to have a more efficiently and effectively identification of shared elements for FRMPs/RBMPs
Taking into account the Strategic Environmental Assessment (and ecosystem services)	reduce conflicts among FRMPs and RBMPs objectives and measures
Synchronizing time of consultation and engagement during all FRMPs and RBMPs drafting process.	Highlight plans interactions for public and other interested parties awareness

1/2

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.2 – Please list the most important aspects of the RBMPs / FRMPs where coordination or information exchange is important and/or could be beneficial and give some brief reasoning as to why (examples might include objectives, measures (land use, NWRM, etc.), economics, public consultation, shared data, etc..)

Important ASPECT for coordination or information exchange	REASON
Free and easy public access to both FRMP and RBMP information	The information needs to be accessible for a better stakeholders and citizens involvement
Multidisciplinary/multisectorial approach and skill of those work in RBMPs or FRMPs	To achieve multiple benefits
Land-use management at catchment level	To share resources/information useful for a more efficient and multi-use water quality and water quantity management
Coordinated Programs and catalogues of measures	To optimize resources and results and reduce contradiction with WFD and FD measures.

2/2

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.3 – Concerning measures selection, is it foreseen that the FRMPs might include structural measures for flood protection which can physically modify the water bodies and prevent the achievement of the good status, or protect water bodies from contamination? If so, have any synergies/conflicts between measures of both RBMPs and FRMPs been identified? If it is possible, please provide any relevant example.

It is foreseen that the FRMPs include structural measures which can physically modify water bodies and possibly prevent the achievement of the good status.

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.4 – Please provide any relevant example of NWRM or other actions already executed or planned to be included in FRMP which will contribute to achieve the compliance with both Directives.

- restoration of floodplains
- protection of flood generation areas
- certain methods of soil conservation
- reforestation
- restoration of natural water flow conditions
- settlement displacements
- introduction of Fluvial Parks
- increasing retention in rural areas (e.g. change of soil cultivation, use of monocultures "water absorptive")
- restoring and maintaining meadows and pastures

EXAMPLES

*Demolition of the Retuerta Dam on
the Aravalle River (Spain)*

***River Mark, Breda, the Netherlands:**
floodplain restoration project, just upstream of
Breda, known as “Bieberg”, incorporates re-
meandering and secondary bypass channels*

PREPARATORY Questionnaire

4) FRMPs / RBMPs

4.5 – Related to FRMPs-2nd RBMPs drafting procedure, please identify which is your case among the ones listed below.

1/2

COUNTRY	(A) Both plans are being carried out jointly	(B) Some part of the procedure is being done jointly				(C) Information needed has been exchanged, but the drafting procedures of the RBMPs and FRMPs are independent from each other.	Intention to merge the FRMPs and the RBMPs into one integrated document	
		(I) Setting the objectives	(II) Strategic Environment Assessment	(III) Selecting measures	(IV) Public information and consultation		1 CYCLE	NEXT CYCLES
